

Cornerstone Community Outreach

What Opportunities are there?

-With over ninety-thousand square feet of building, housing more than four-hundred people each night, there are a lot of needs

Adopt a Floor

Each floor is a home to many. Every home needs to be cared for. Daily cleaning is done and is helpful, but sometimes that deep-clean done every once in a while is so needed. You and/ or your group would pick a floor and a time when you could come and use some elbow grease to make it shine.

One Room at A Time (A Touch of Paint)

The rooms at Sylvia Center have been a home to many families. Sometimes more that five families in a year will have moved in and out of each room. And the usage shows. Painting, repairs and decorating, each room can be a project of its own, will make the room better for the next family on their way to self-sufficiency.

The Free Store Challenge

When you donate clothing, the items are arranged in our Free Store for those who are in need, to "shop" from. Before they are displayed, they are sorted in the back. And with such abundant donations, there is a lot to go through. The challenge is to come up with a practical way to store and sort the items for the Free Store. Get you engineering mind or buddy thinking, and see what you can come up with.

Sort-a-Thon

Do you like to make order out of chaos? The Free Store needs you. One person brings the clothing, someone needs to sort. The Free Store is a great resource to have for those in need. A job interview and you need a suit? New baby and nothing fits? Having the donations sorted is an ongoing task that can be very rewarding.

Builders R Us

As a broader task, if you are experienced in construction, remodeling and décor, you can put those gifts to work in many areas of our buildings. Before you can clean an area, it has to be finished. Mudding, sanding, painting, trimming, door repair, tiling, it's all there. And the needs are always changing.
